Election/Restrictions

Claim 3 is generic to a plurality of disclosed patentably distinct species of the polymerizable unsaturated monomer (d):

- (i) containing a polymerizable unsaturated monomer having a *linear or branched* hydrocarbon group having 6 or more carbon atoms (Claim 4);
- (ii) containing a polymerizable unsaturated monomer having a *cycloalkyl* group (Claim 5).

Applicant is advised that the reply to this requirement to be complete **must include an election of the species** to be examined (either Claim 4 or Claim 5) even though the requirement be traversed (37 CFR 1.143).

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
